

happy

ily

Little earth is ill.

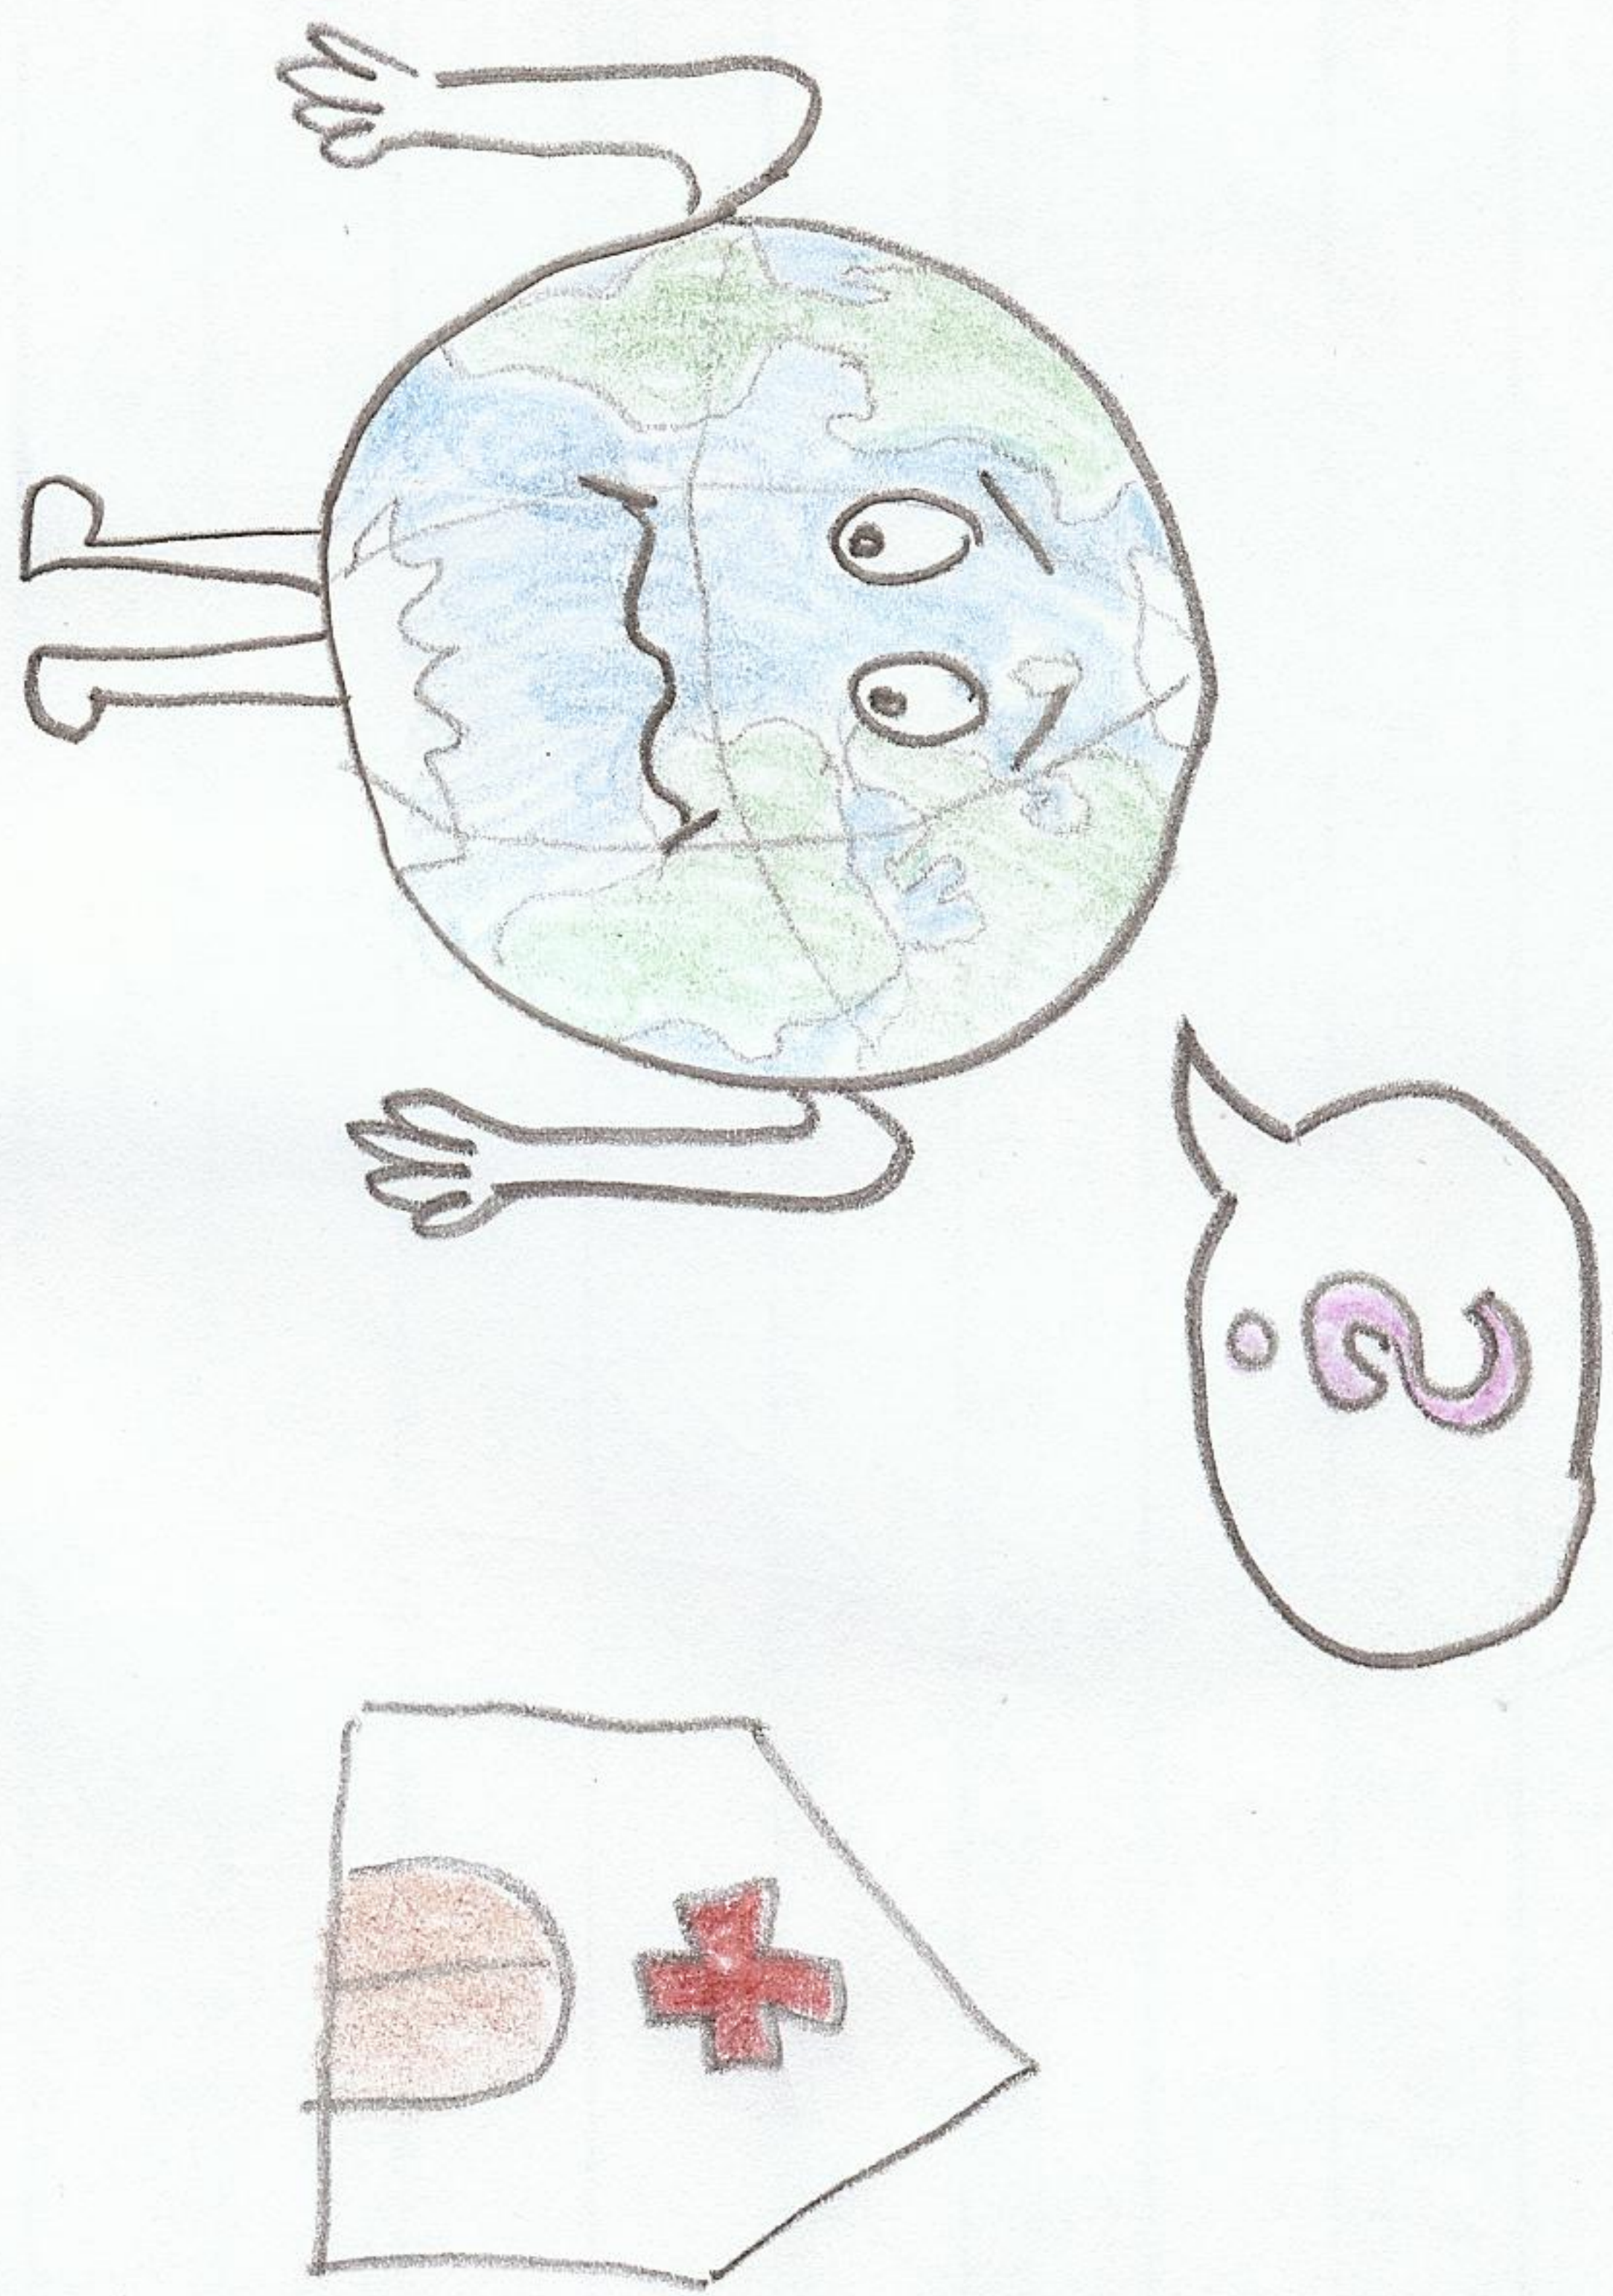

She has temperature and
is not feeling very well.

Poor little earth!

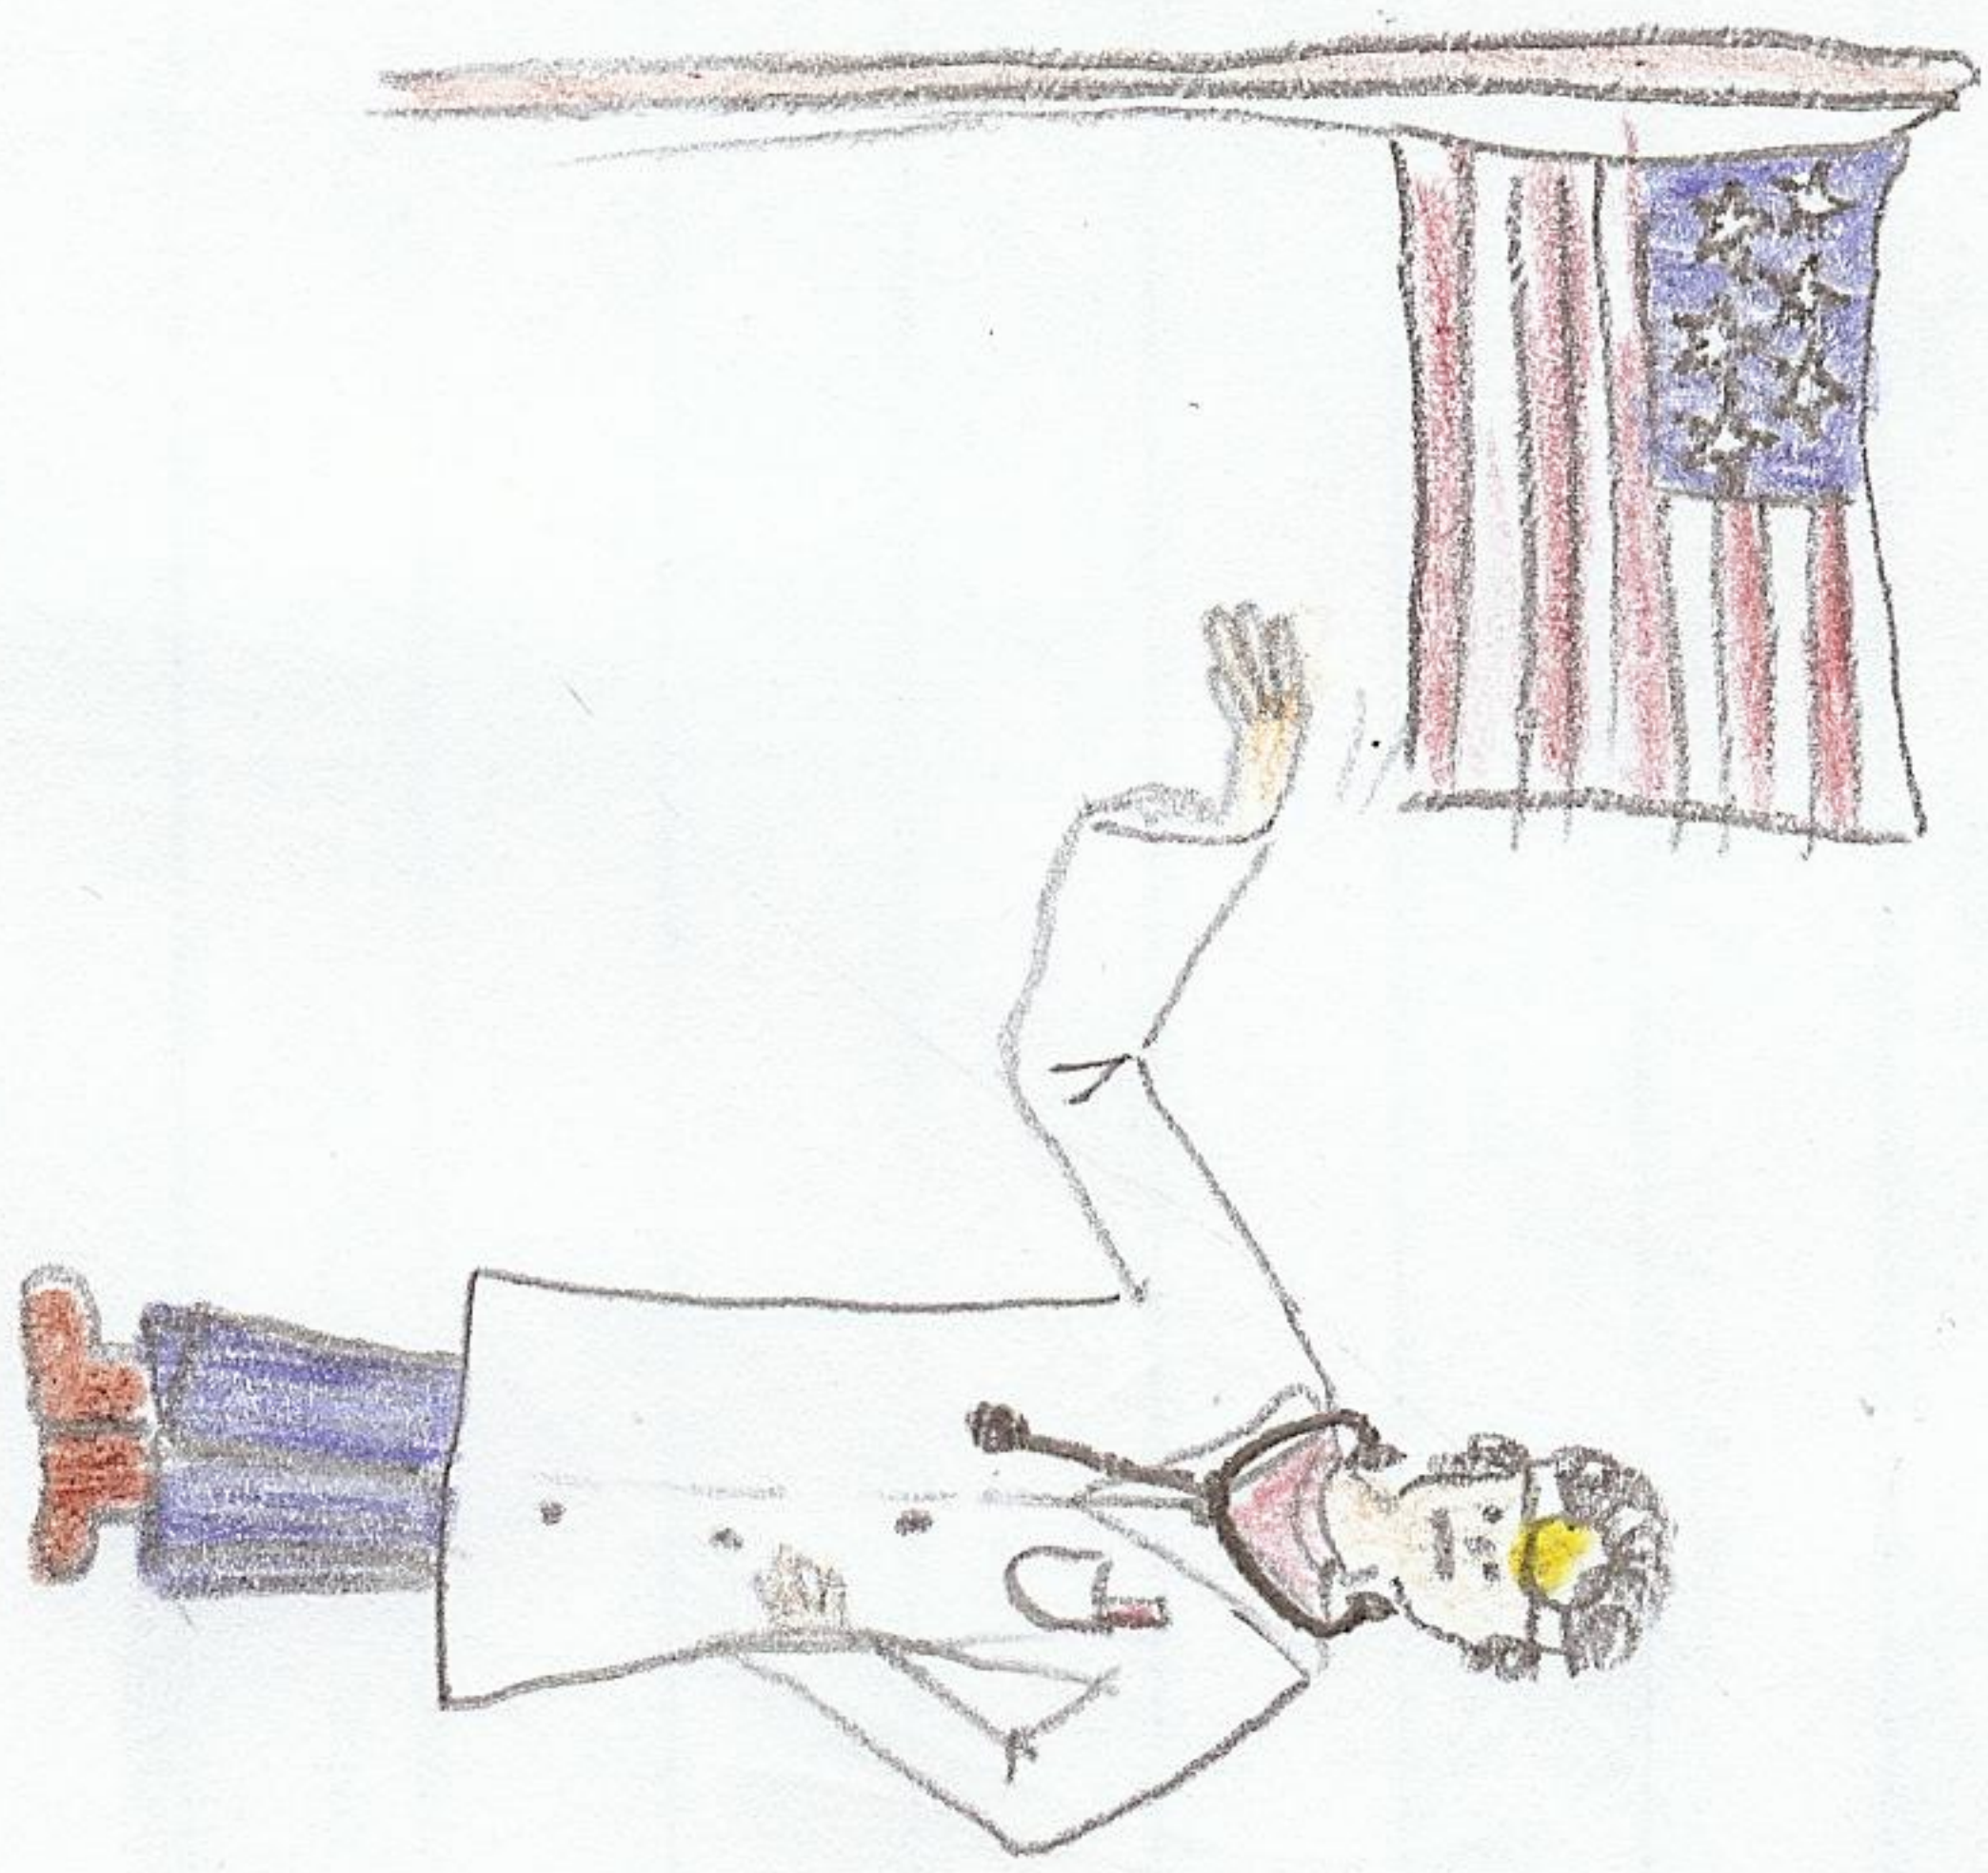

Little earth is getting worse.
Temperature is rising, the
earth is sweating,
but none cares.

Little earth doesn't know
what to do, so she asked
a group of doctors for
help.

Little earth asked Dr. USA :
"Can you help me ?"

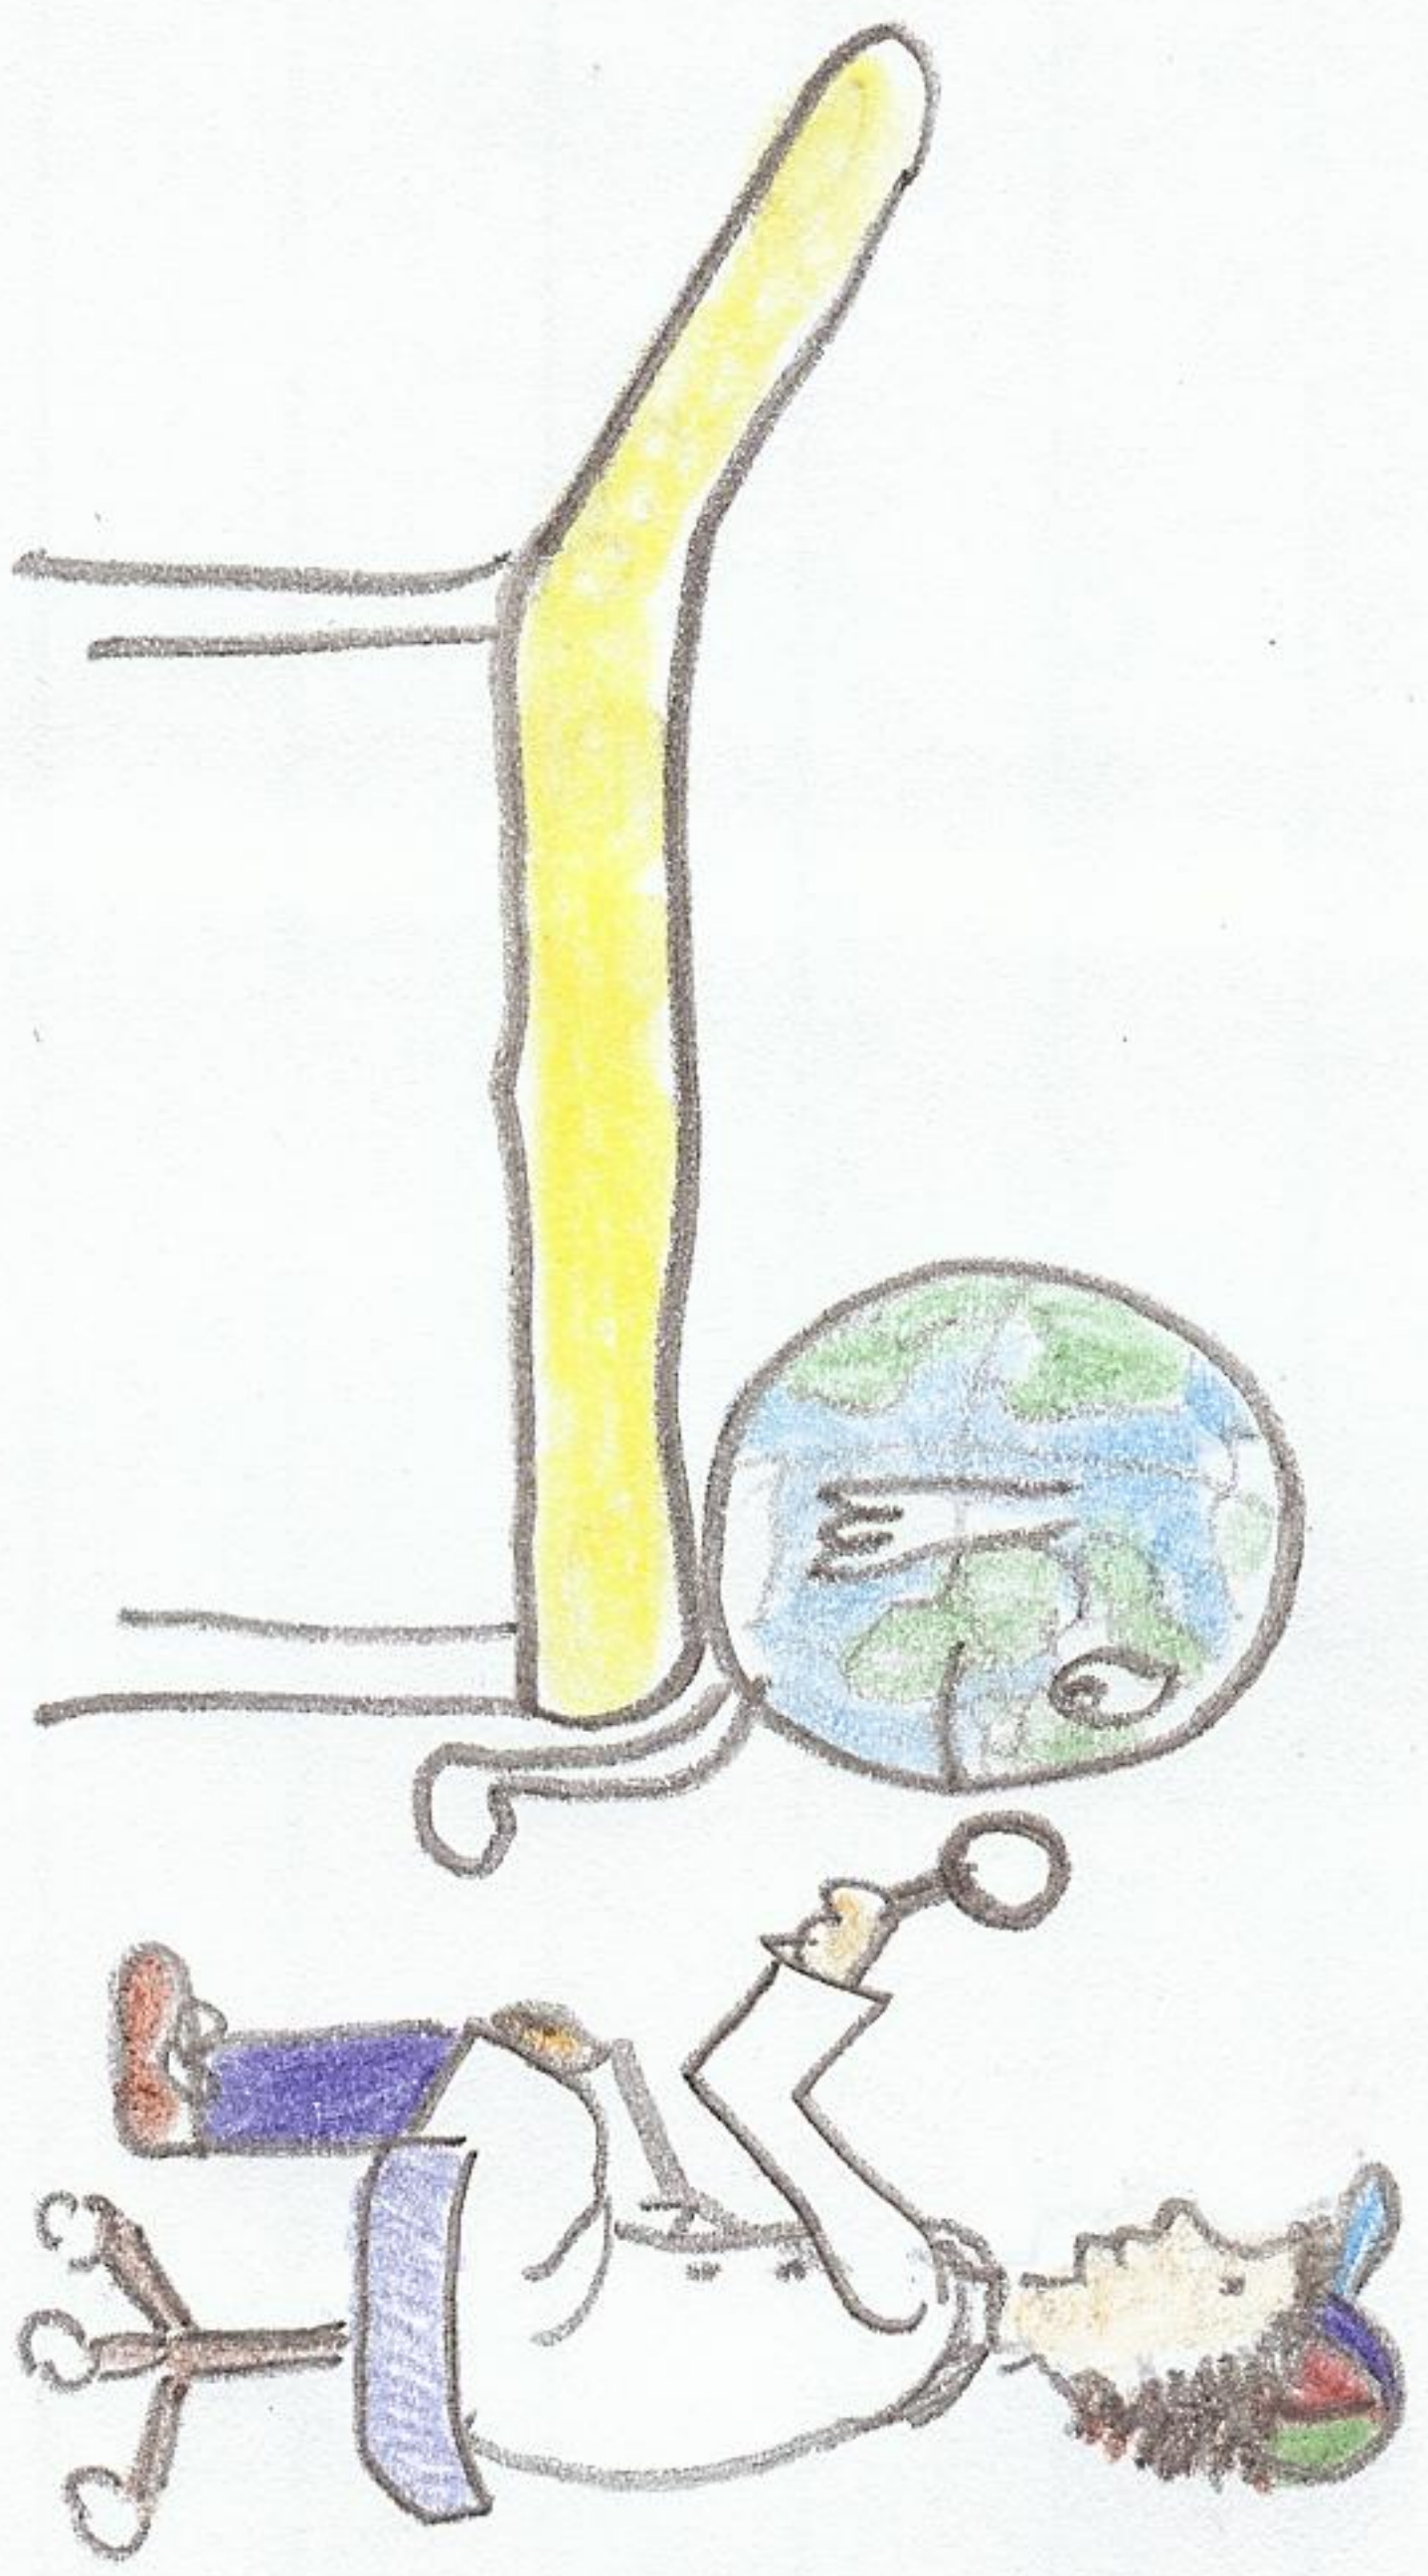

The doctor says :
"You are not so bad. You get
better by yourself !"

Little earth asks Dr. Europe:
"Can you help me?"

But Dr. Europe answers:
"We can sell you some nice
pills which make you better,
when you have enough
money!"

But little earth does not have
enough money.

So she asks the last doctor,
a very young one:

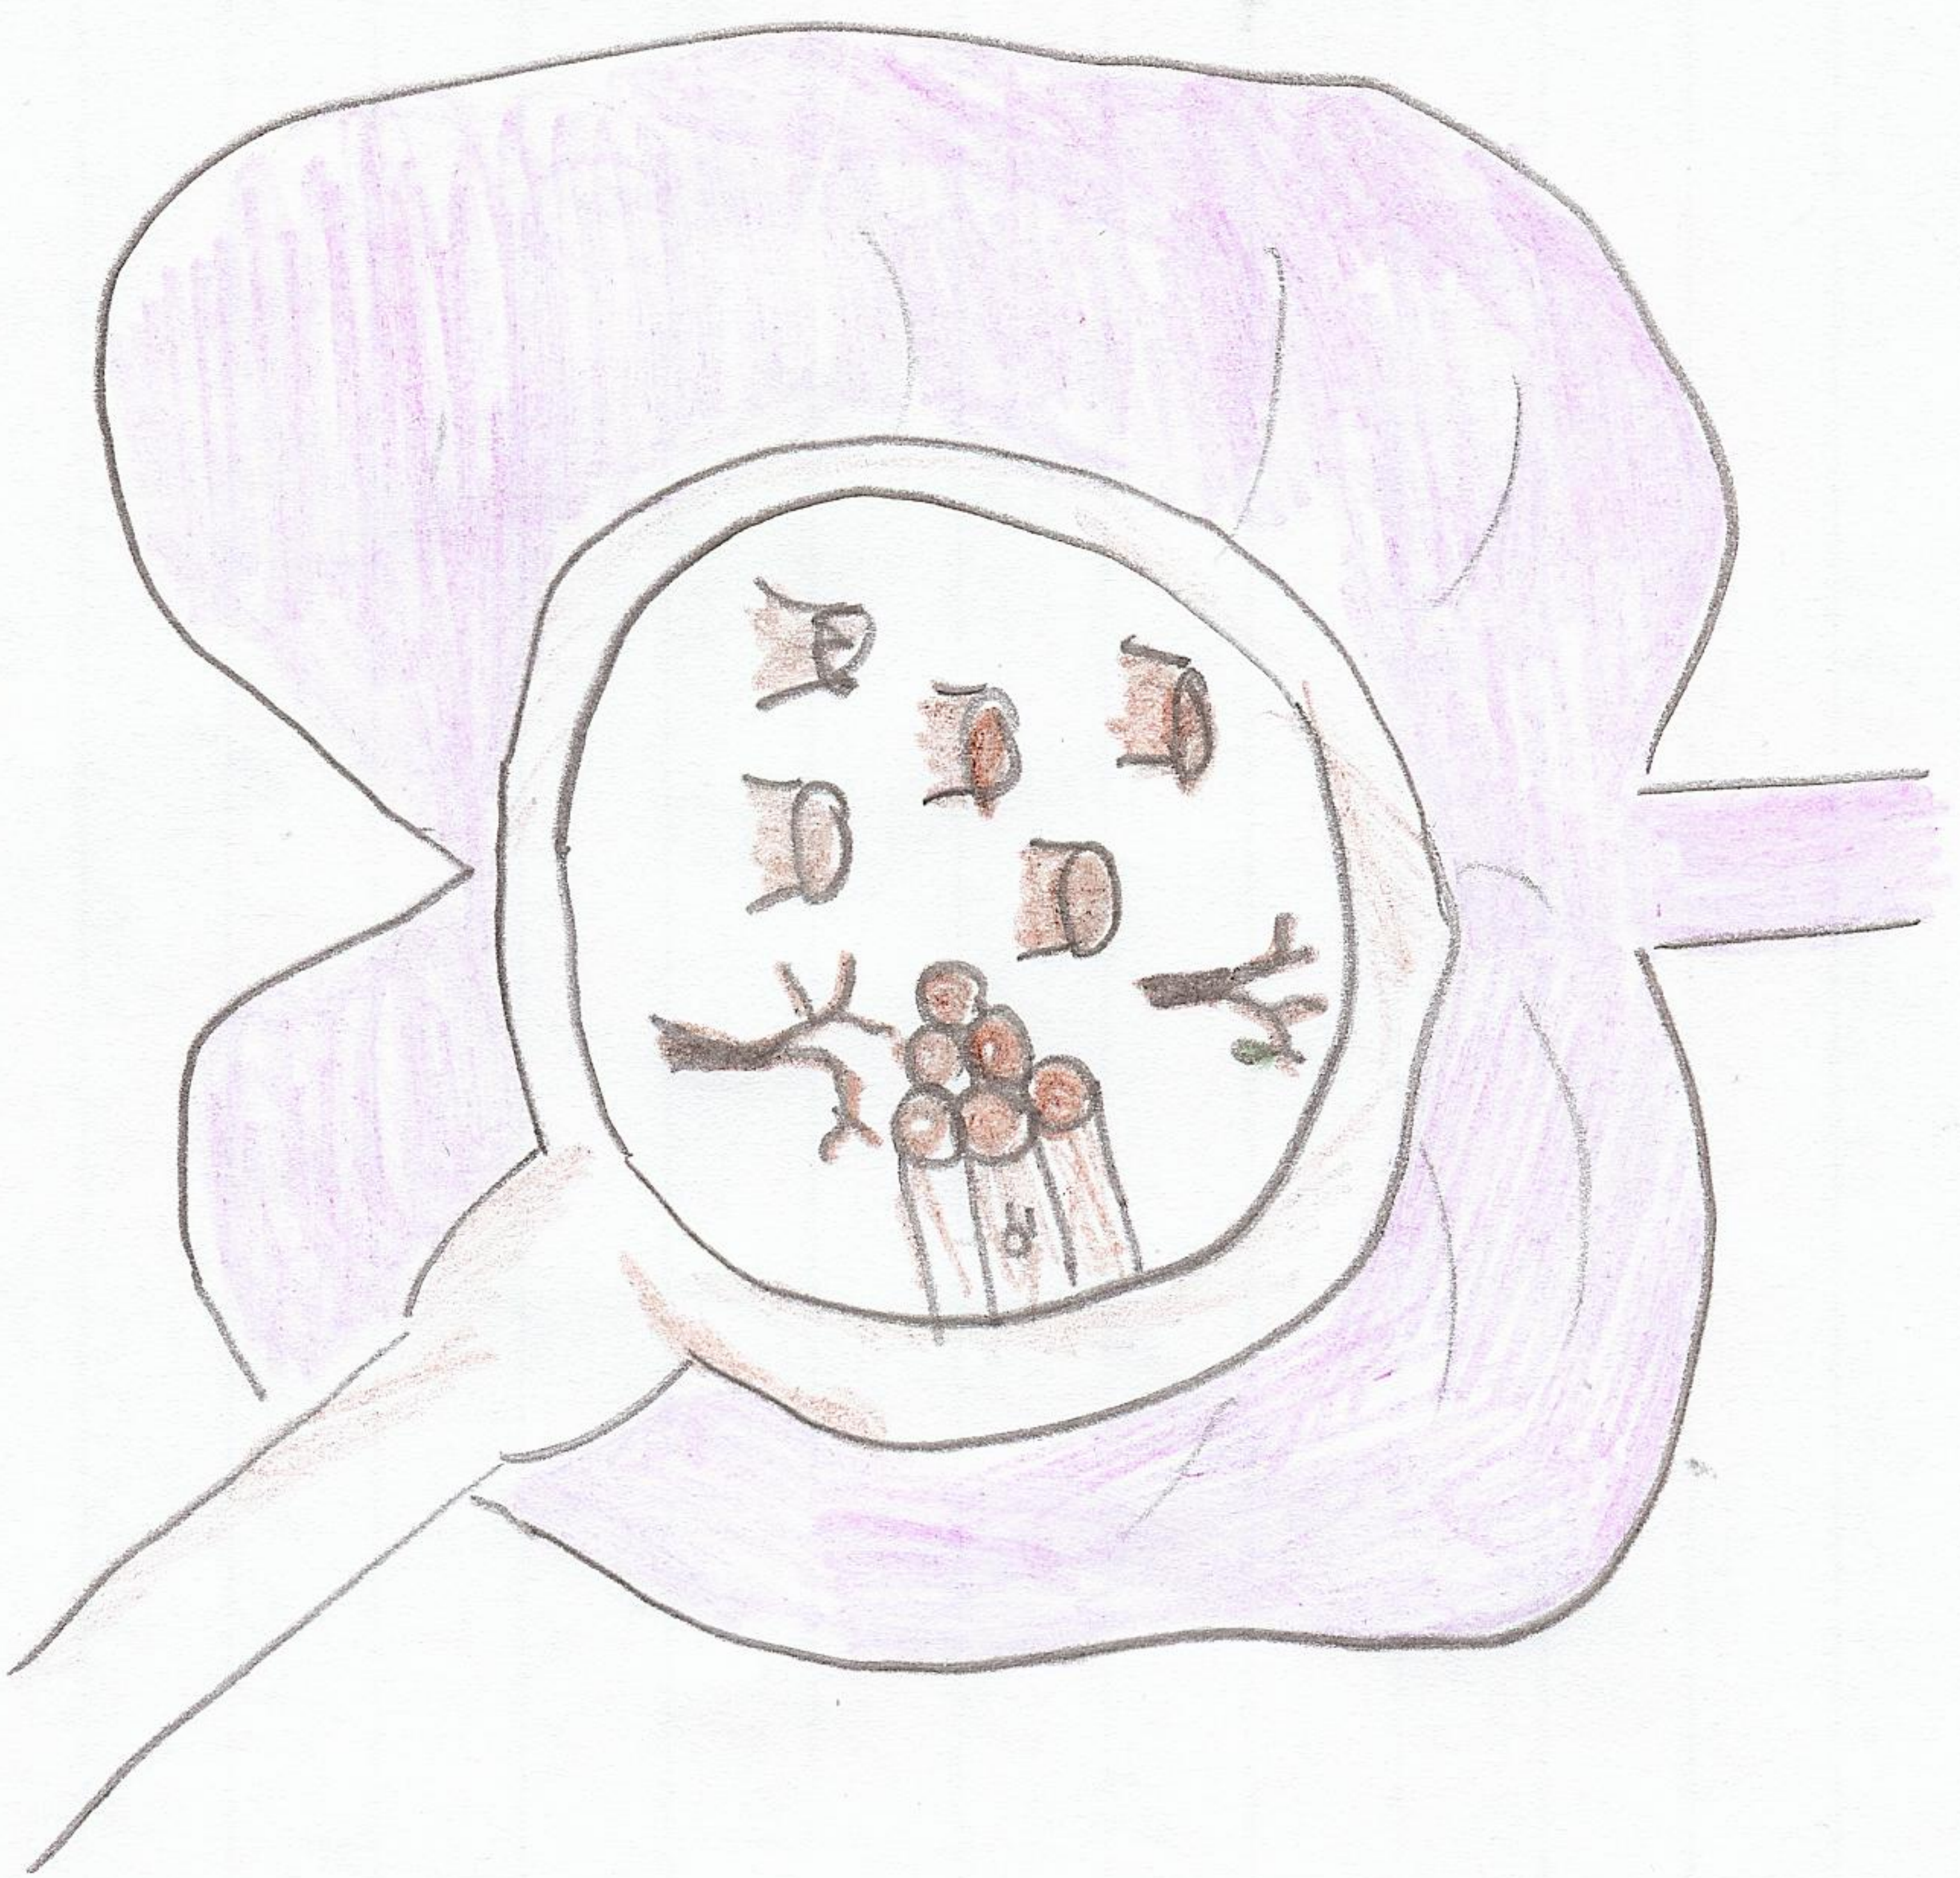

"Can you help me?"

He asks:

"What's wrong with you?"

"I feel bad. I am very hot
and have a temperature."

"That means your body is
fighting a bad influence. We
have to find the negative
influence. Let's have a look
around:"

"I'm not
happy"

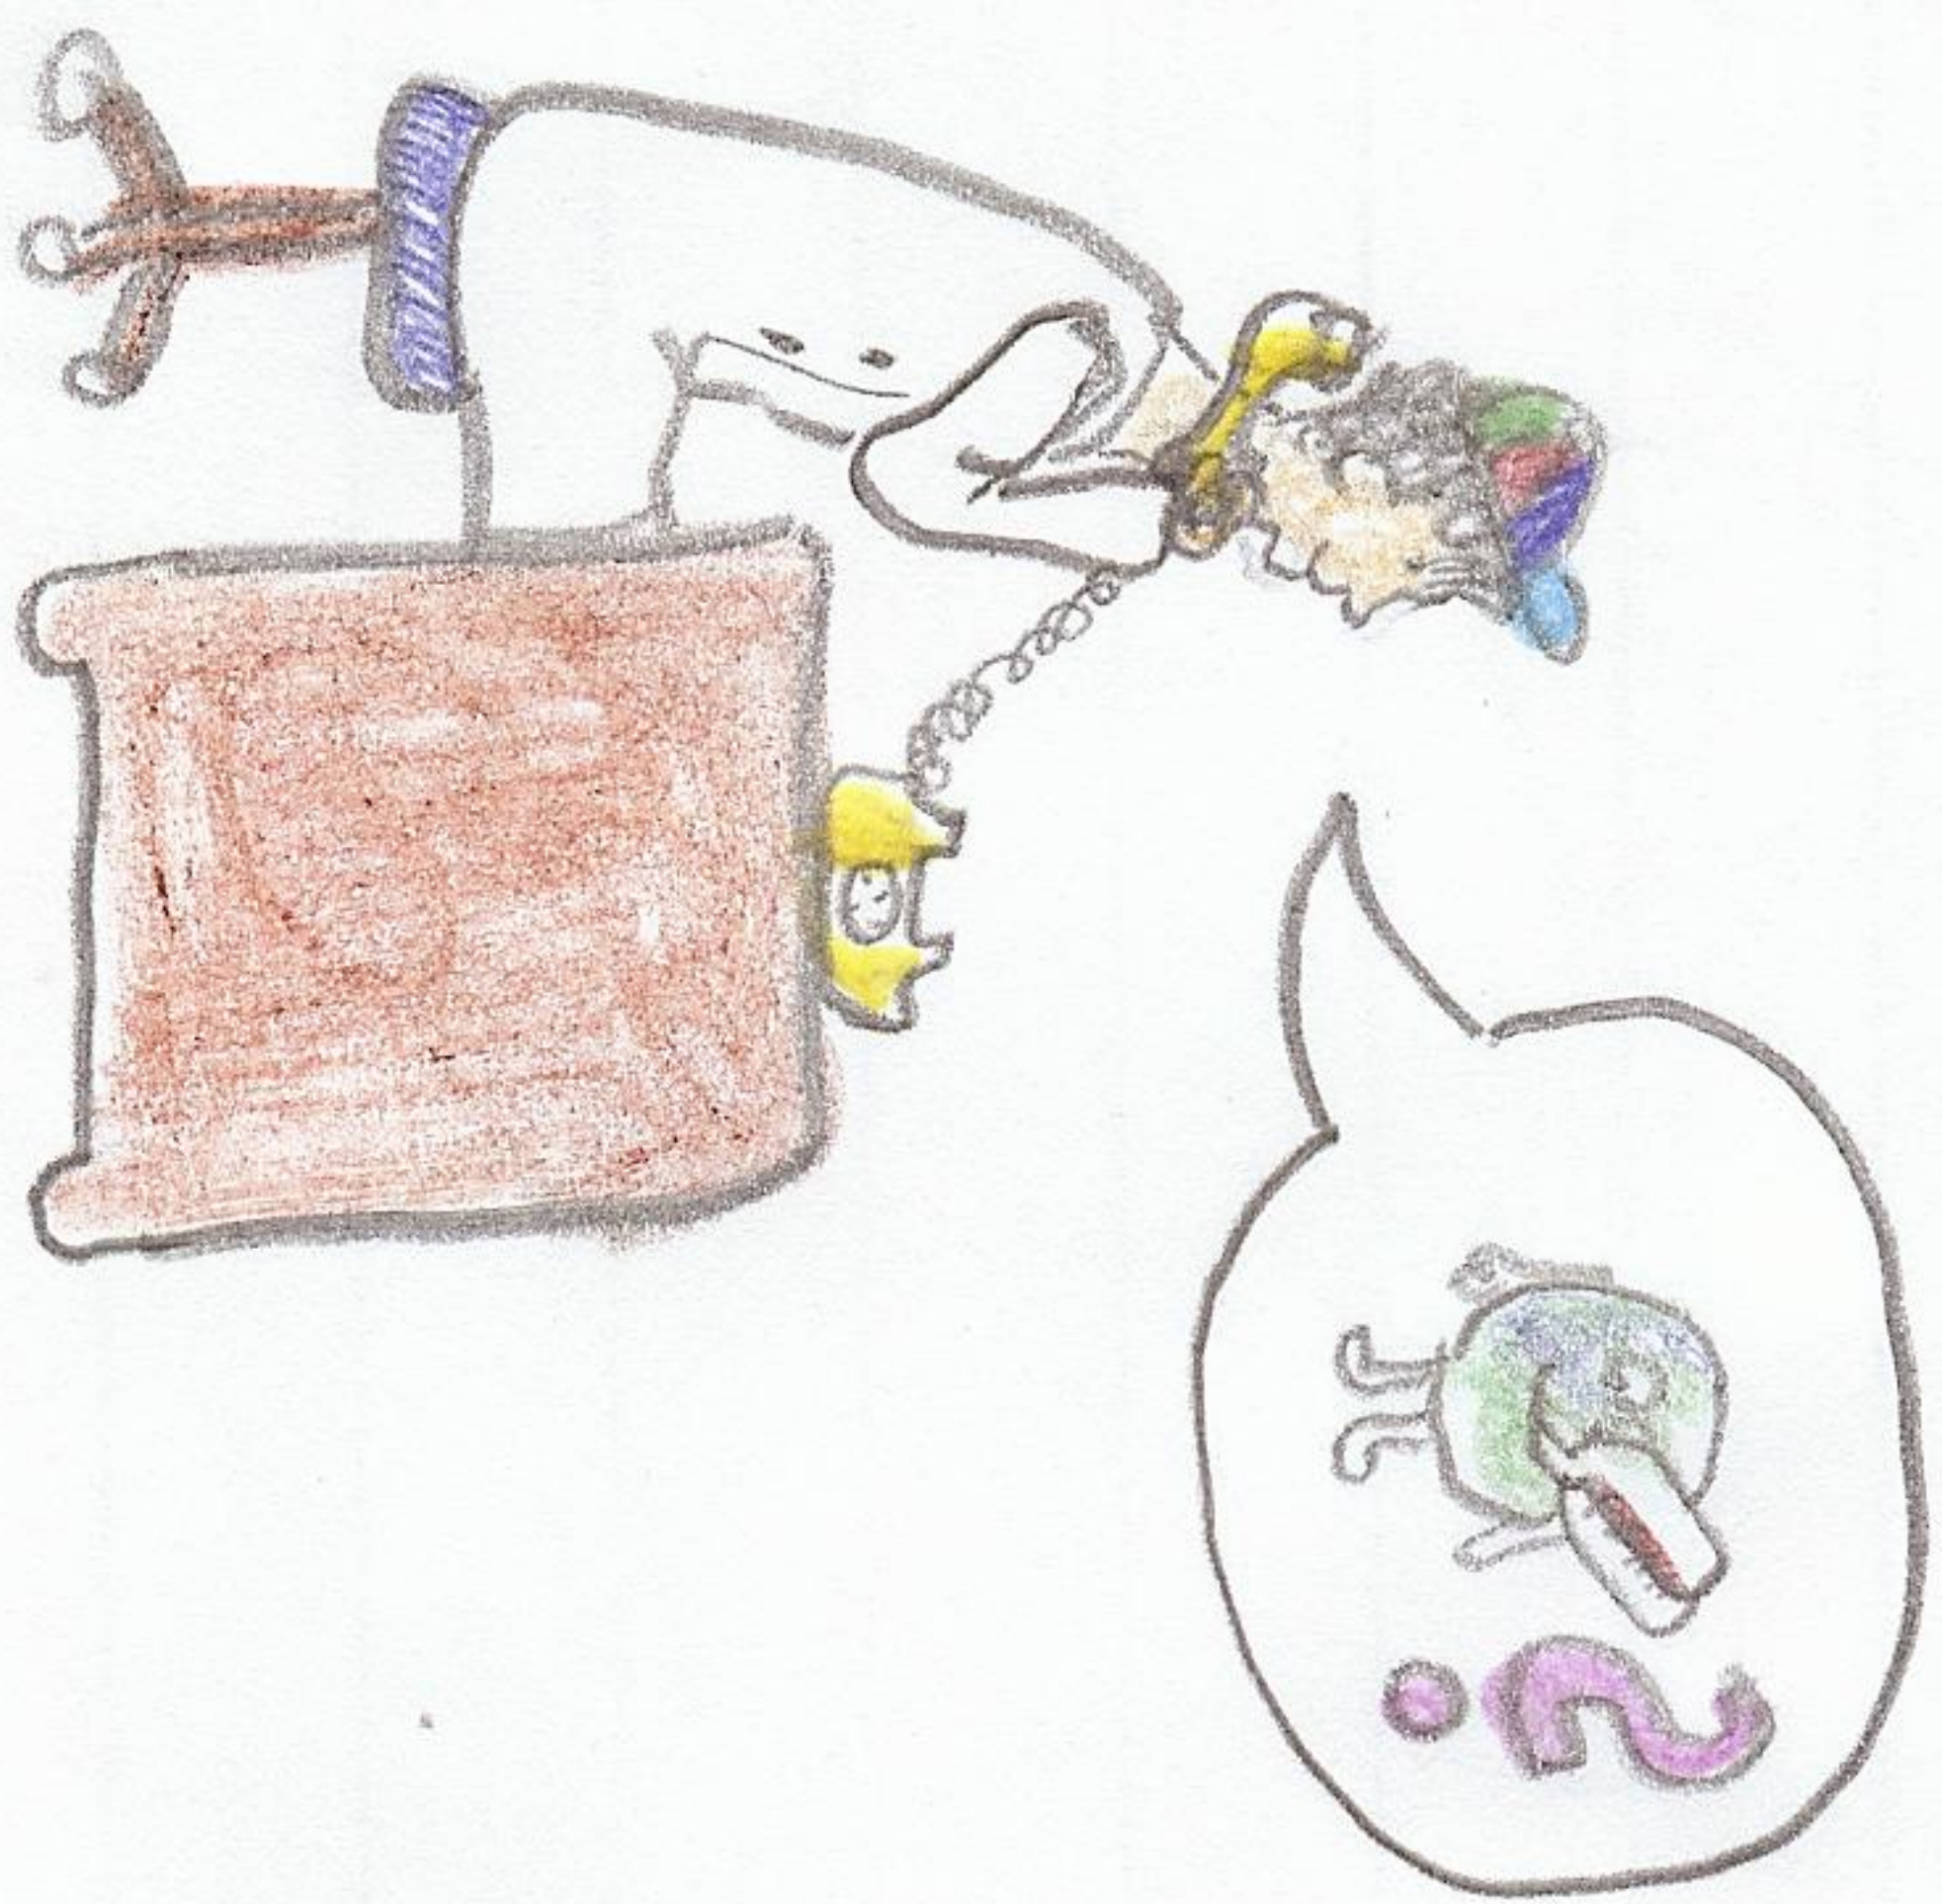

"Look, there are not enough
trees in your lungs!"

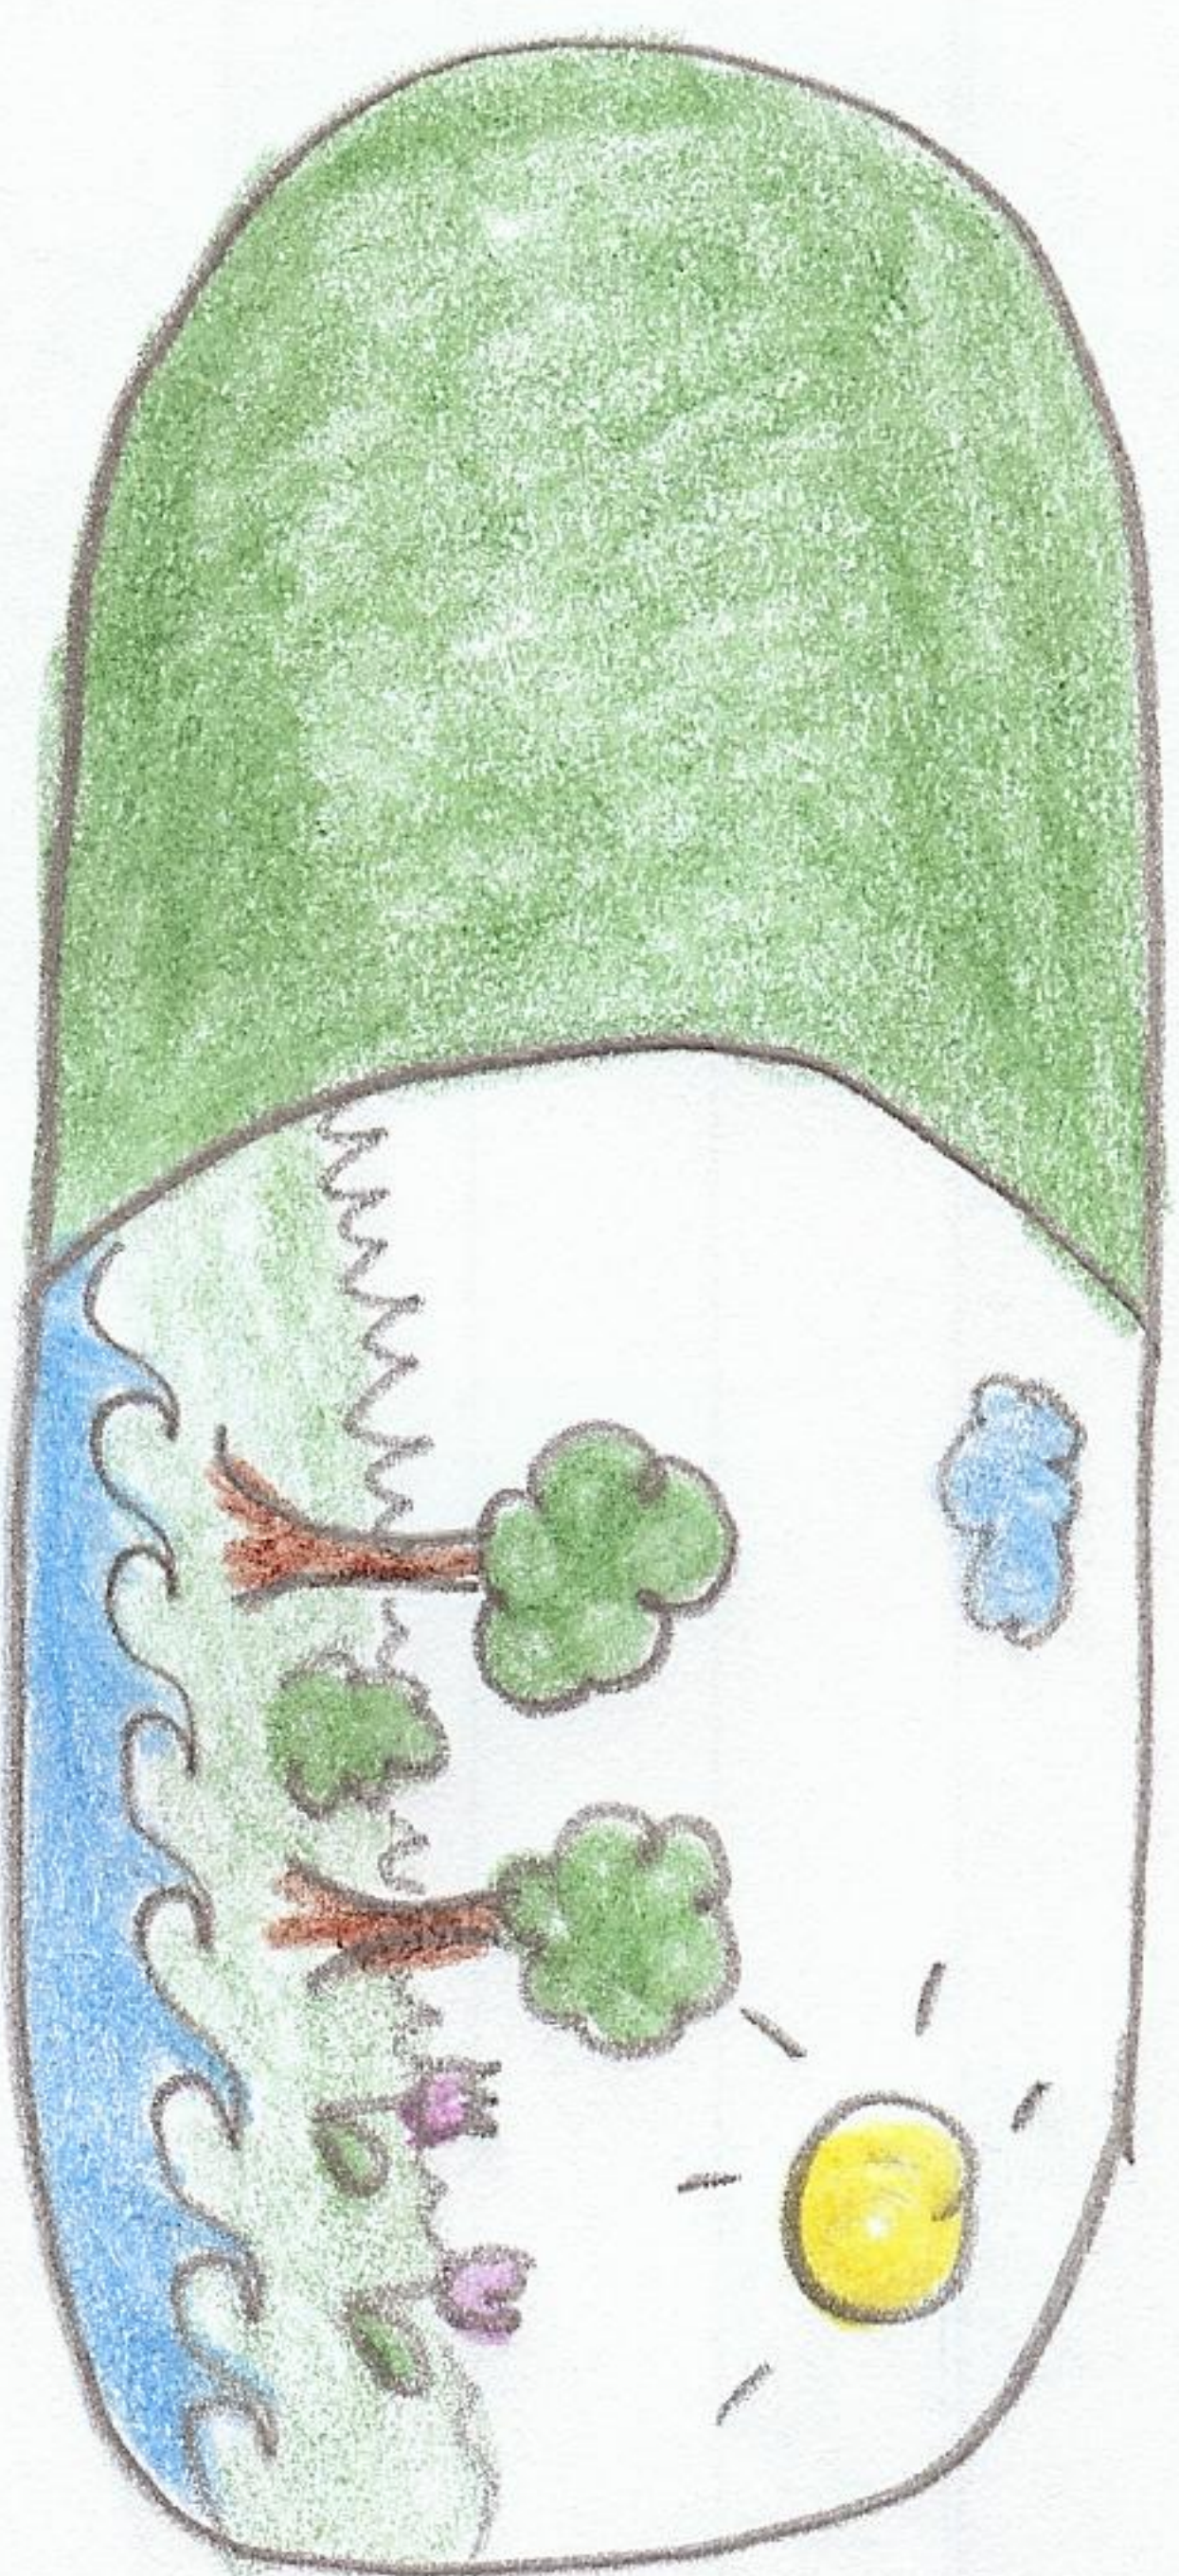

"And your drinking water is
very grey and dirty!"

That doctor was thinking
very hard how to help little
earth.

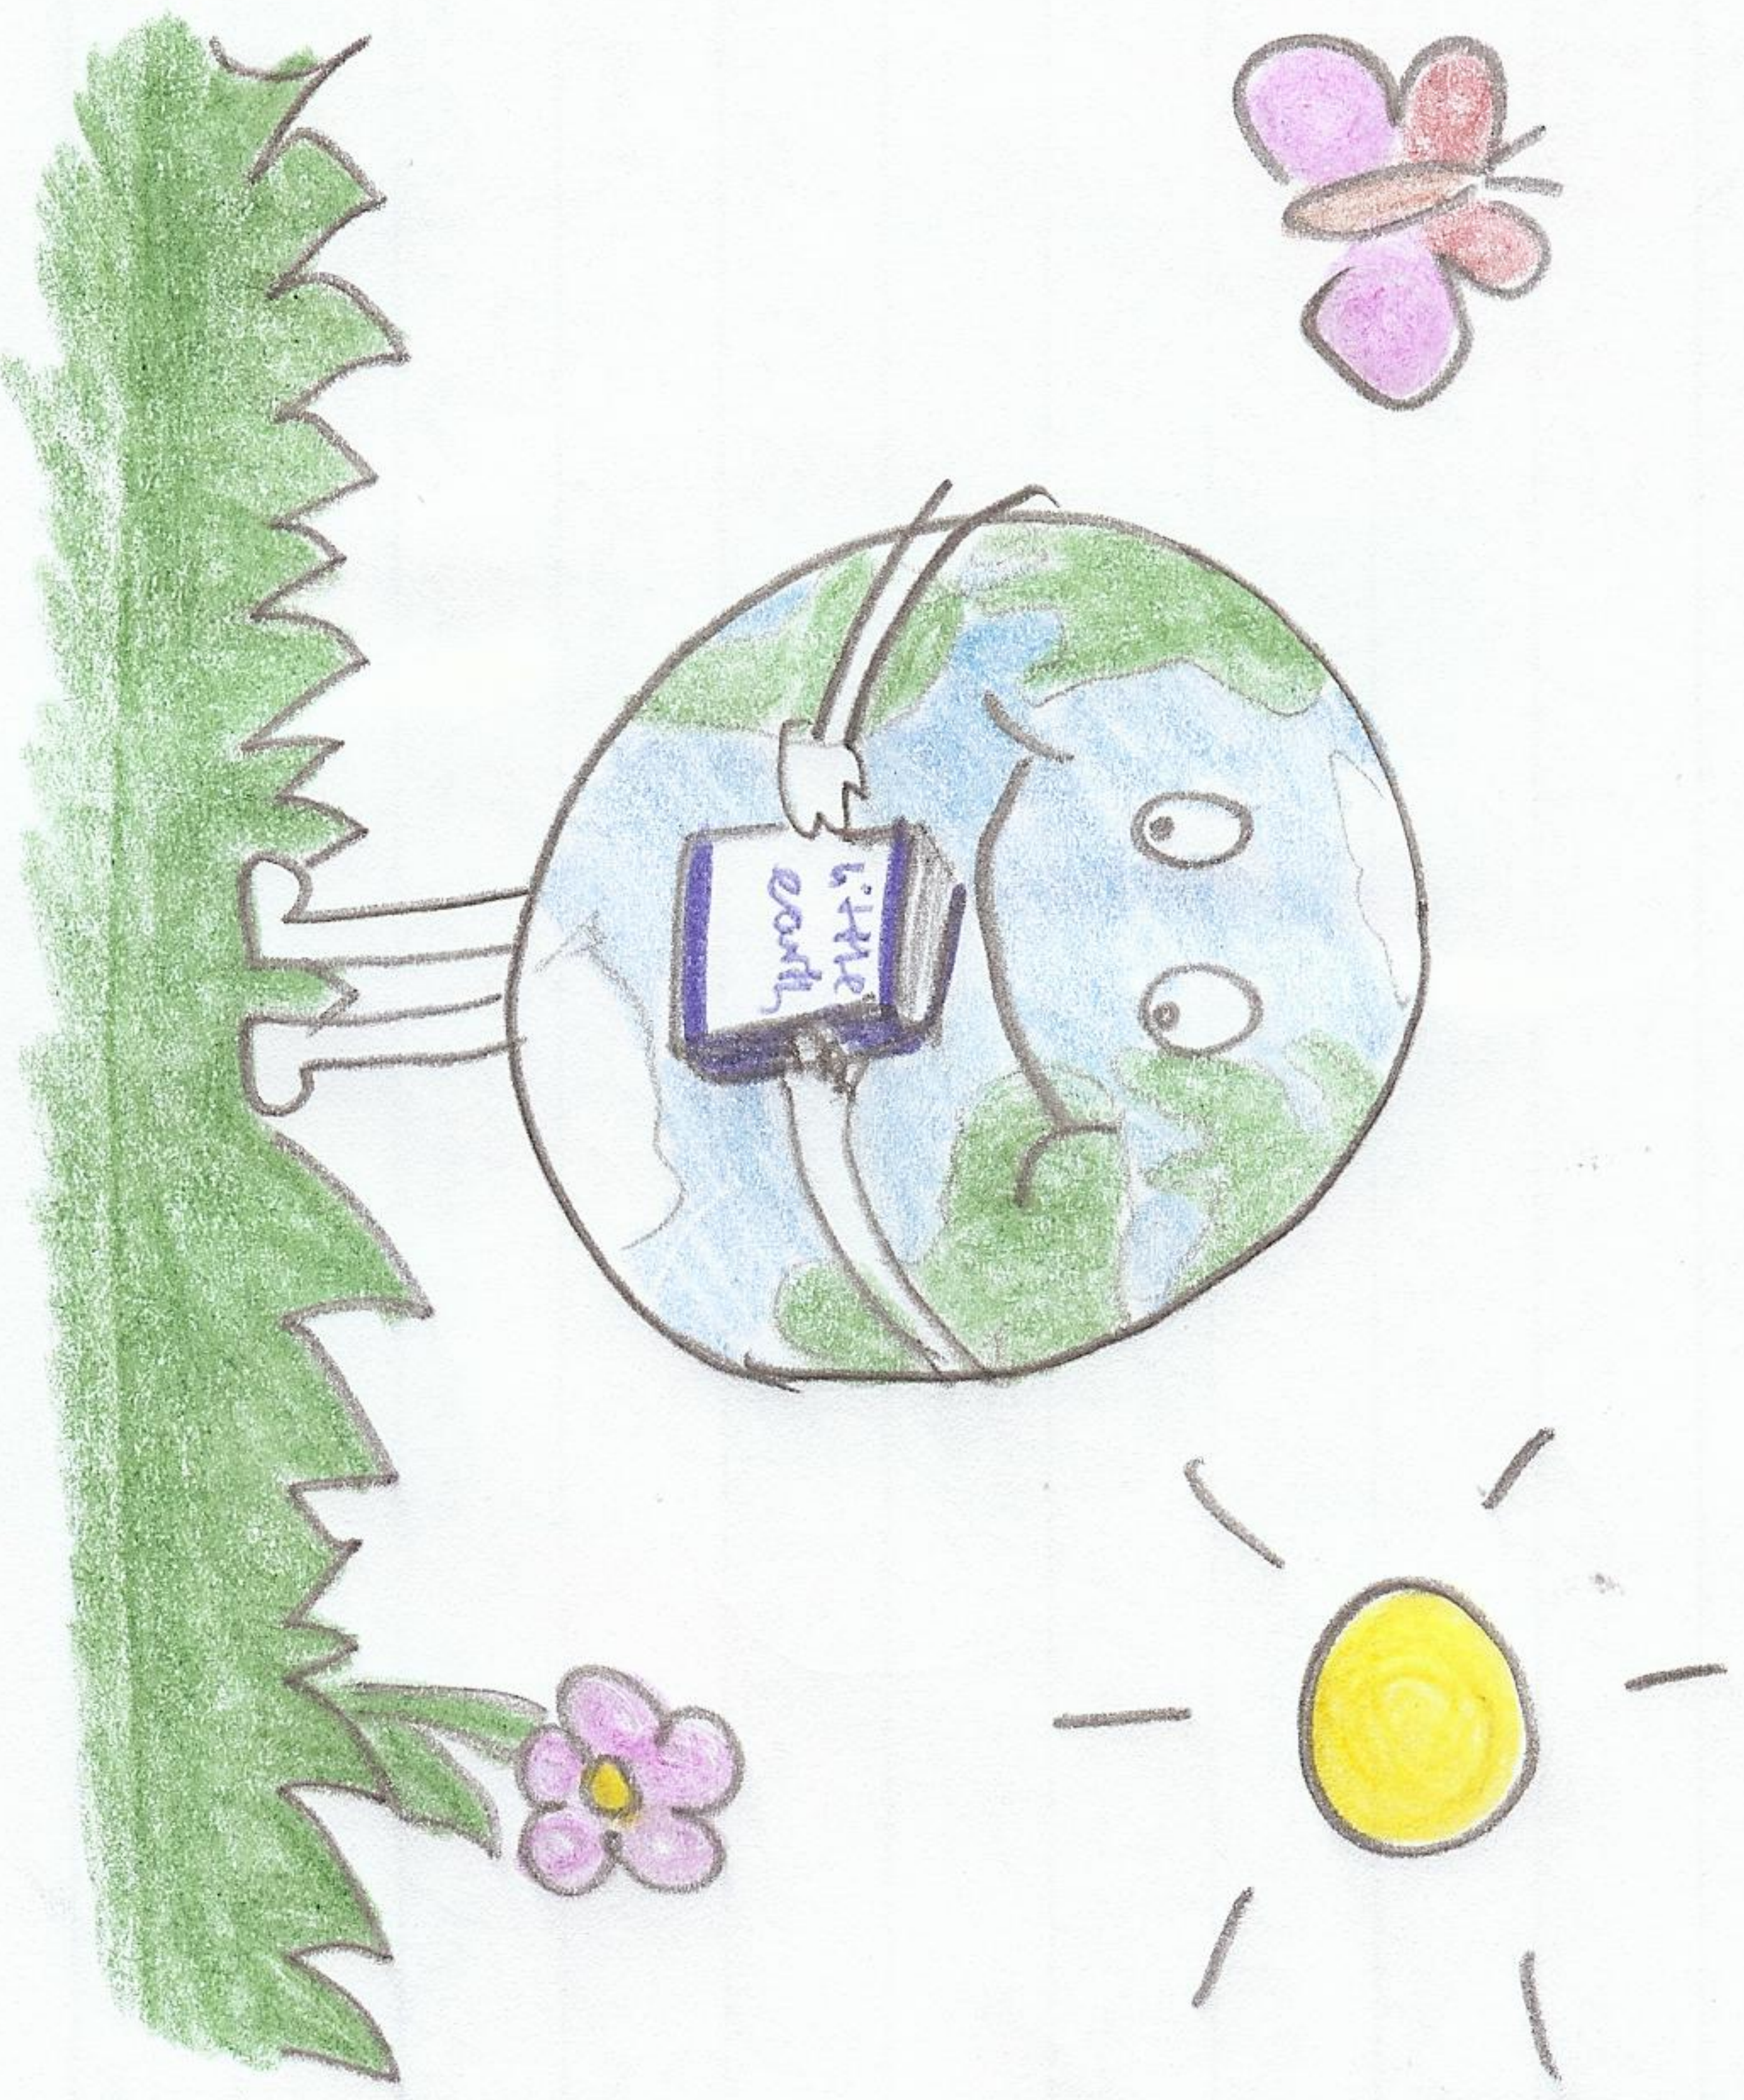

He asked all his friends
to help him and find the
right medicine for his new
friend little earth.

When they found the right medicine they recognised that it's not only important for little earth, but also for every man, every woman and every child.

The young doctor and his friends planted lots of trees and cleaned a lot of water. That's how they found the medicine.

little earth was so happy
when she felt better that
she wanted to share her
knowledge with everyone.

This is why she wrote this
book only for you.

THE END
